STAMP ACCESSORIES 2019

Dear collectors,

Passion and pleasure are two terms that we at LIGHTHOUSE have been pursuing for over 100 years with our high-quality accessories. We are, therefore, pleased to present this Accessories for Philatelists catalogue, containing our extensive range of accessories for stamp enthusiasts.

More than 6,000 products bear the LIGHTHOUSE brand name, which has become a symbol of top quality and practicality. That is why we are always on the lookout for new, original products which will make your hobby even more enjoyable. Your feedback is very important to us. Please support us with your comments, suggestions and even criticisms, and do not hesitate to contact us at **kunden@leuchtturm.com**

In addition to our diverse array of well-respected philatelist classics, the catalogue contains a range of exciting new products, such as the universal PUR GRANDE binder featuring an understated linen look (see page 21), the matching transparent SH312 covers with different-sized divisions, which are ideal for our budget-conscious collectors (see page 24) as well as our "Metallic Edition" COMFORT stockbooks in the contemporary colours of gold, silver and bronze (see page 37)!

We hope you enjoy the fascinating world of stamps!

Use the quickfinder to find your way around the catalogue!

The accessories catalogue is subdivided into different categories. One category is "optical accessories", for example. Every category is assigned a colour, for example, "optical accessories" is orange. On the following pages, you will find a coloured section on the right-hand margin which indicates the colour of the respective category. This means you will be able to recognise immediately which category you are looking at. The quickfinder primarily helps you to jump to the desired accessory category, without having to look through every single page of the catalogue. Try it out!

Stockbooks and stockcards

When we mention stockbooks, we refer to stamp albums with card pages featuring horizontal glassine or film strips, into which the stamps are inserted. Even if part of the collection is stored elsewhere, e.g. in illustrated albums, stockbooks can serve as storage space for duplicates, as a mobile solution e.g. for trading or to accommodate the most valuable pieces in a deposit box and are an essential piece of kit for philatelists.

On the following pages, you will find over 70 different varieties to match every taste and use. Please choose the size of your stockbook, the colour of the card, the number of pages and the material and colour of the binding.

More information about the characteristics and suitability of our sheets is available on our website at www.leuchtturm.com.

Brand quality made by LIGHTHOUSE

Please be aware of the subtle differences between our stockbooks when making your selection:

The embossed gold or silver stripes give our covers their particularly noble finish.

Double-sided interleaves (glassine or clear film) guarantee optimum protection for your stamps.

Tried and tested **double-hinged binding (DLH)** means pages lie flat (doesn't unlock).

High-grammage card. Choose between white, black and chamois-coloured pages.

Heavy duty **leather*** with a **leatherette cover** or **elegant genuine-leather cover**. * **LEFA** = bonded leather material consisting of leather fibres and other sustainable natural raw materials.

Matching **slipcases** are available separately for COMFORT, COMFORT DELUXE, PREMIUM and LEATHER formats (see following pages).

LEFA = **L**eather **F**abrics (bonded leather) is a bookbinding material consisting of leather fibres and other sustainable, natural raw materials (natural tanning agents, natural latex, natural fats and dyes).

By felting the leather fibres, the LEFA material has almost all the important characteristics of natural leather. No other material comes so close to natural leather in terms of quality and workmanship as LEFA.

The LEFA cover material we use is characterised by optimum physical characteristics (tensile strength, strong seams, durability, tear resistance, etc.).

Only high-quality and carefully selected raw materials are used for LIGHTHOUSE products in order to ensure the desired product characteristics.

INTERCEPT®-Box L180 for letters and postcards

The box with active protection against ageing and oxidation

The L180 box actively protects your collection from ageing and oxidation thanks to the INTERCEPT® material inside. Ideal for protecting paper, coins and medallions. Suitable for postcards, letters, stockcards, documents, coin sets, etc. up to 180 x 160 mm ($7 \times 6 \frac{1}{4}$ ") in size. Overall size: 338 x 167 x 204 mm ($13 \frac{1}{4} \times 6 \frac{5}{8} \times 8$ ").

The way an INTERCEPT® box works is based on over 30 years of patented INTERCEPT® technology: The copper particles contained in the material permanently bond with corrosive gases and create a neutralised atmosphere in the shortest time possible, protecting documents and coins from ageing or tarnishing (at least 15 years guaranteed protection!). The effect has been proven according to approved DIN, EN, ISO and ASTM standards.

Ref. No. 345 417

£ 38.95

* You can notice any deterioration in the effectiveness of the material if you see a dark grey to greenish discolouration of the film (not the coins!). If this happens, you should replace the INTERCEPT® product with a new one.

Illustrated albums

Sophisticated philately requires a professional footing and attention to detail. The LEUCHTTURM-branded illustrated albums are expertly made with great attention to detail, hence the high quality of material and manufacturing is vital.

Furthermore, LEUCHTTURM provides the stamp collector with an entire range of philatelic accessories to satisfy all their needs. LEUCHTTURM illustrated albums fulfil the demands of even experienced and expert philatelists with a huge selection of over 120 collection areas and editorial, philatelic compilation by our specialist editors.

To store your collection in style, we offer binders with various mechanisms in a range of designs in the same high quality. Binders featuring extremely high-quality, heavy duty covers with gold embossing have become firm favourites for collectors.

The advantages of LIGHTHOUSE illustrated albums

LIGHTHOUSE prints its album pages (size 270 x 297 mm/13-hole system) on non-ageing wood and acid-free card (170 g/m²) in high-resolution black and white offset print. Colour printing is consciously avoided. This allows you to immediately spot the missing stamps in your collection. SF mounts in sizes which match the stamps, made from clear, anti-glare polystyrene film, free from chemical softener are glued to the card of the albums. The mounts hold the stamps securely in place and prevent them from sticking. They also optimally protect your collection from dust and damage.

Many LIGHTHOUSE illustrated album pages are also available without SF protective covers in a “regular” version.

The individual characteristics of similar stamps which vary in e.g. colour, perforation or printing process are noted on the respective album sheets. This only applies to stamps with MICHEL (major) numbers and includes the year where required.

In this way we always ensure an aesthetically pleasing overall presentation.

Superior black and white print quality – you can immediately spot the missing stamps in your collection.

Optimum protection for your stamps using the appropriate SF mounts (100% polystyrene, free from chemical softeners and stabilisers).

13 punched holes, meaning sheet remains in position in the binder, elongated punched holes to ensure sheets remain flat.

Sheets match 4 different binder types (springback binder, turn-bar binder and screw binder).

LB sheets

LB sheets are card sheets in album format which come with a welded protective pocket. The film for our LB sheets is made from 100% polystyrene. Leading archives and museums worldwide recommend polyester for the long-term storage of stamps, records and other valuable documents. The practical LB system with all its different combinations of strips and pockets was developed after years of research and careful study of collectors' needs. With the LB pages you can give your collection that special personal look. They are particularly useful for topical collections or adding special items to existing country albums. You can design any combination or grouping you desire. Mint sheets, maxi-cards, FDCs, booklets, singles, block souvenir sheets, even postal stationery. The blank system is also ideal for storing and displaying new stamps prior to receiving your new supplements.

Overall size of the LB page is: 270 x 297 mm (10 ⁵/₈ x 11 ³/₄").

Sponge for dampening SF protective covers

The LIGHTHOUSE sponge is ideal for dampening SF protective covers, pre-cut mounts and strips. It boasts excellent water binding properties. The sponge quickly absorbs any liquid upon contact with water. The SF mounts are dampened by briefly placing them on the sponge, pressing and then sticking. Material: PVA. Size: 125 x 50 x 30 mm (5 x 2 x 1 1/4").

Ref. No. 357 702

Please note: the sponge will become hard when dry, but loosens up again upon contact with water.

Simply the best and safest mount for your stamps

- Maximum protection against sticking, discolouration, dust and humidity.
- Stamps held securely in place by strong clamp-type seal.
- SF mounts are made from 100% polystyrene (free from softening agents, acids and stabilising chemicals).
- Antireflection coating prevents light interference.
- Special adhesive on reverse side of film (simply moisten and stick down!).

1. LIGHTHOUSE pre-cut SF mounts

For most standard sizes. Please note: the size of the mount is cut 4 mm larger than the actual stamp for that nice centred" look. The sizes listed in the chart represent the size of the stamp. You do not need to add extra margin.

2. LIGHTHOUSE SF strips

217 mm (8 1/2") long, in various heights. Here, too, the strip is 4 mm higher than the given stamp size. Cut the width to your requirements.

3. LIGHTHOUSE SF mounts for blocks

In most popular sizes. For postal stationery, blocks, mini-sheets etc. For more information, please see "The advantages of LIGHTHOUSE illustrated albums" at the beginning of the section.

Did you know?

Magnifiers with 2-3X magnification

These magnifiers are suitable for viewing whole stamps and coins. The image found on the object can be easily viewed with their help and the fine details become visible. These magnifiers can also be used as a reading aid.

Magnifiers with 5-7X magnification

The majority of details can now be identified. Unfortunately, increased magnification of the diameter lens also means reduced reading surface. The distance between the eye and the magnifier as well as between the magnifier and the object is minimised.

Magnifiers with 10-20X magnification

You are now very close to the Collectors' piece with this magnification and the smallest details are visible. Individual pixels can be differentiated for the majority of printing processes. You can't get a finer detail than this.

Microscopes

Intaglio printing becomes more vivid, microprinting can now be viewed more easily and safer, and plate flaws are more easily detectable.

Digital microscopes

Thanks to digital technology, stamps and coins can be viewed on the screen. The software provided allows you to capture images of the objects, save them and edit the image.

Light

A good source of light is vital but not always available. LED technology now gives light to even the smallest of magnifiers so that objects being viewed are well illuminated. You can now purchase LEDs with long-wave UV light for identifying fluorescence.

Handy multifunctional magnifiers

Two aspheric lenses made of acrylic glass ensure a high quality of image. Lens size: 30 x 37 mm (large lens) and 15 mm diameter (small lens). Versatile in its use thanks to 3 different light functions: 3 high-tech LEDs (torch), one long-wave UV lamp for checking the authenticity of banknotes and 1 white LED light to provide light to examine your collections even in bad lighting conditions. Black plastic case. Includes batteries and a protective cover made of leatherette.

5-in-1 pocket magnifier
